MAYER FRIEG

Software Engineer – Full Stack

Cairo, Egypt | +20 128 824 4283 | mayerfrieg@outlook.com

LinkedIn | GitHub | Portfolio

SUMMARY

Full-Stack Software Engineer experienced in building production web applications using Node.js, NestJS, Next.js, React, TypeScript and PostgreSQL. Skilled across the full stack, from designing REST APIs, databases and caching to building clean, responsive user interfaces and AI-powered features on Google Cloud, with additional experience in mobile development. I take ownership of complex features from requirements to production, collaborate well in Agile teams, and care about clean, maintainable and high-performance code.

SKILLS

Backend: Node.js, NestJS, Express.js, Python, REST APIs, GraphQL, Swagger, Prisma, TypeORM, JWT & OAuth Authentication, Socket.io (WebSockets), Event-driven Architecture, Multi-tenant Architecture

Frontend: Next.js (SSR, SSG, App Router), React, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, HTML5, CSS3

Databases: PostgreSQL, MongoDB, MySQL, Redis (caching), Firebase

Cloud & AI: Google Cloud Platform (Pub/Sub, Cloud Storage), AWS, Docker, CI/CD, OpenAI API, Gemini API, Speech-to-Text & LLM summarization

Tools & Practices: Git, GitHub, Vercel, Linux, Jest, Unit & Integration Testing, Debugging, Code Reviews, Agile/Scrum, AI-assisted development (Claude Code)

Soft Skills: Communication, Teamwork, Problem-Solving, Ownership, Leadership, Time Management

EXPERIENCE

Software Engineer – Full Stack | QueenSoft, Egypt — Jun 2025 – Present

Next.js · NestJS · Node.js · TypeScript · PostgreSQL · Redis · Python · GCP (Pub/Sub, Cloud Storage) · OpenAI · Gemini

Grace App — *scalable, AI-powered practice-management SaaS for Canadian mental-health professionals (psychotherapists, psychologists, social workers, counsellors), covering clinical notes, scheduling, billing and eClaims, telehealth, a client portal and reporting; bilingual (EN/FR) and designed around Canadian privacy standards (PHIPA/PIPEDA).* joingrace.ai

- **Built most of the platform's UI** and its integration with the backend APIs in Next.js and TypeScript, turning product requirements into complete, production-ready features.
- **Owned the appointment-scheduling module single-handedly:** appointment creation across all cases (in-person, telehealth and phone visits; single and recurring sessions; multi-provider calendars), provider-availability checks, input validation and conflict detection to prevent double-booking and overlaps.
- **Built the client booking-links feature** end to end, letting clients self-book sessions through shareable links based on each provider's real availability.
- **Built the waitlist module** end to end, enabling waitlist-aware scheduling so practices can fill openings when slots become available.
- **Built AI-powered session features:** live session transcription and AI-generated session summaries, powered by an event-driven pipeline and an isolated Python AI service on Google Cloud.
- Developed backend services in NestJS for multi-tenant user management and role aggregation, enforcing organization-level access control and data security, and improved performance through Redis caching of frequently accessed data.
- Work in an Agile/Scrum team, coordinating closely between frontend and backend to deliver reliable releases.

Freelance Frontend & Mobile Developer | SafetyZone (client) — Oct 2025 – Present

Next.js · TypeScript · Tailwind CSS · Flutter · Firebase · Socket.io

- **Own the frontend of all three products** of an emergency-safety platform connecting the public with civil-defense responders, working in a small team with the client from requirements to launch.
- **Built, deployed and launched the consumer website** in Next.js, TypeScript and Tailwind CSS, with Firebase-backed incident reporting and responsive, performance-optimized pages.
- **Building the consumer and provider mobile apps** in Flutter: incident reporting and live tracking for the public, and incident management and dispatch coordination for responders.
- **Integrated real-time updates with Socket.io** so incident status and dispatch messages reach the public and responders instantly.

Android Developer Intern | Banque Misr Aug 2024 – Sep 2024

Kotlin · Jetpack Compose · Material Design · REST APIs

- Built the frontend of **Speedo Transfer**, a money-transfer mobile app, in a 3-person team using Kotlin and Jetpack Compose.
- Developed the app's screens, UI components and navigation flow, and connected the interface to the app's REST APIs and data layer.

PROJECTS

MayerHub — Personal Life Manager | *Web + desktop (Windows, macOS, Linux) · AI APIs* mayer-rise-up.vercel.app

- Designed and shipped an all-in-one product (tasks, finances, calendar, notes, journal, health, reports) as a web app plus desktop installers for three OSes on one shared backend and account system.
- Integrated external AI APIs to power smart features, including an AI food tracker and smart expense tracking.

Mini-Instapay — Microservices Payments | *React · Node.js · MongoDB · RabbitMQ · Docker · Kubernetes*

- Built the React/Tailwind frontend for a P2P payment platform with JWT auth, transaction history, RabbitMQ-driven notifications and financial reports (4-person team).

AutoInsight — Graduation Project, A+ | *React · Redux · Tailwind CSS · FastAPI · ML* github.com/MayerS22/AutoInsight

- Built the frontend dashboard for a platform that turns uploaded company data into cleaned datasets, ML forecasts and chatbot answers for layoff planning (5-person team).

E-Commerce Mobile App | *Flutter · Firebase · Dart* github.com/MayerS22/E-commerce-Mobile-App

- Shopping app with product browsing, cart and Firebase authentication flows.

EDUCATION

B.Sc. Computer and Information Sciences, Ain Shams University • CGPA 3.025 • Graduation Project A+ 2025

CERTIFICATIONS

- **Claude Code in Action** — Anthropic
- **Claude Code 101** — Anthropic
- **Claude 101** — Anthropic
- **AI Fluency: Framework & Foundations** — Anthropic
- **Introduction to Claude Cowork** — Anthropic
- **Introduction to Sub-Agents** — Anthropic

TRAINING PROGRAMS

- **ALX Software Engineering Program** (Feb – Apr 2023): Git, Linux, C, computer-science fundamentals
- **Data Engineering — Potenia, Ain Shams University** (Aug – Sep 2023): BI, data modeling, warehousing, ETL, Power BI
- **Flutter Development — Support, Ain Shams University** (Aug – Sep 2023): Dart, widgets, Firebase, REST APIs, Sqflite

LEADERSHIP & ADDITIONAL EXPERIENCE

HR Team Leader (Volunteer) | Microsoft Student Partners (MSP), Ain Shams University Oct 2022 – Oct 2023

- Led the HR team of a student tech community: coordinated members, organized internal events and activities, and kept the team engaged and aligned.

Assistant to Foundation Manager | Christian Medical Foundation (CMF) Aug 2024 – Mar 2026

- Supported the foundation manager with reports, meeting coordination and event organization, keeping operations organized and on schedule.

Database & Data Entry | Christian Medical Foundation (CMF) Sep 2022 – Feb 2023

- Designed and built a Microsoft Access database to organize the foundation's records and managed accurate data entry.
